

# Workshop Outline

## MY MAGICAL MANIFESTO

### WHAT IS IT ABOUT?

This half-day session is both an introduction to practical magic, and opportunity to undertake some time-honoured steps in esoteric psychology towards attaining your most important life goals. You will carry out actual work to set up your own 'Magical Manifesto' which you will take home to continue working on in earnest, as a true Magician.

### WHO WILL LOVE IT?

Anyone who has a pull towards magic and mysticism, and wants to feel utterly empowered to harness the powers of Magick towards the interests of personal development. If you are drawn to the philosophies of New Thought, or the practices of Positive Psychology and Cognitive Behaviour Therapy, this workshop offers a magical perspective on these themes.

### WHAT WILL I GET OUT OF THIS SESSION?

During this session you will explore the origins of magical self development and will work on setting and achieving your current 'chief aim.' After attending the session you will:

- Have greater understanding of practical Magic.
- Have the confidence and knowledge to use the first steps in esoteric psychology to identify, set, and go after your personal goals.
- Feel empowered as a true Magician.
